**OJJDP FY 2017 Family Drug Court Statewide System Reform Implementation**

WASHINGTON – The following Fiscal Year 2017 Office of Juvenile Justice and Delinquency Prevention grant awards were announced today:

Program Description: The Office of Juvenile Justice and Delinquency Prevention (OJJDP) Fiscal Year (FY) 2017 Family Drug Court Statewide System Reform Implementation program aligns with the Attorney General’s priorities of reducing drug use, including opioid use, by building the effectiveness of family drug court practices at the individual and local levels and institutionalizing them in the larger state-level child welfare, substance abuse treatment, and court systems to improve child, parent, and family outcomes. The goal is for states to serve more families affected by parental substance use disorders who are involved in the child welfare system. This year’s grantees include:

## Government Resource Center Continuous Performance Monitoring

- GRC continuous performance monitoring through data collection & analysis
  - New sites may be asked to cooperate with GRC for data analysis work
    - Quarterly Performance Measurement of the 11 performance measures for all sites
    - Quarterly Benchmarking: Individual reports for each demonstration site
    - Semiannual Progress Reports
    - Annual Evaluation

## Ohio SSIP Performance Measures

### Child/Youth Measures

1. Children remain at home
2. Occurrence of child maltreatment
3. Average length of stay in foster care
4. Re-entries to foster care placement
5. Timeliness of reunification
6. Timeliness of permanency

### Adult Measures

1. Access to substance abuse treatment
2. Retention in substance abuse treatment
3. Reduced substance use
4. Employment
5. Criminal behavior

## Preliminary findings

- FDTC participation had a significant positive effect on substance abuse treatment participation and retention
- Parents participating in FDTC were more likely to be engaged in behavioral health services and medication assisted treatment
- Among expansion participants, improvements in treatment and retention were observed in community mental health and substance use disorder counseling, medication assisted treatment, and other healthcare services provided for a behavioral health primary diagnosis

## Preliminary findings continued

- Among infusion participants, improvements were observed in pharmacological management and healthcare service provided for a behavioral health primary diagnosis
- Infusion participants were less likely to receive MAT and experienced shorter retention in MAT
- No significant positive impact was observed in child welfare performance measures
  - The study timeframe may have been too short to adequately assess some of these child welfare measures

## Additional support

- System Improvement Efforts
  - Supportive funds to local courts through competitive bid process
  - Courts may apply for funds based on local needs. Priority will be given to sites planning to improve their technology for data collection, reporting, and analysis as well as sites planning to improve language access to specialized dockets in their county.
